Position: Production Specialist

Company: Kisik Aerial Survey Inc.

Address: Unit 3 – 4340 King Street, Delta, BC. V4K 0A5 (CZBB)

Website: www.kisik.ca

Apply via Email: careers@kisik.ca

Kisik Aerial Survey provides reliable, high quality aerial surveying for Geospatial users throughout Western Canada and the Northwest United States. Our people are our single greatest strength – delivering safe, professional and reliable service with the utmost integrity. We are committed to providing an unbeatable level of customer service, quality and efficiency to our clients and partners.

We are looking for an enthusiastic and highly motivated individual to fulfill a full-time position as a *Production Specialist*. This is an in-person, full-time position, based out of our office and headquarters at the Boundary Bay Airport (CZBB). This individual must have a high level of energy, resourcefulness, and be able to take initiative. Technical aptitude, discipline, organization, and excellent communication are essential in providing exceptional customer service.

We care about each other, we care about our team, we care about creating an *en'joy'*able work environment, and we care about your individual learning and development. And, when we say we care about safety – we really do mean it. Kisik welcomes diversity and encourages all qualified candidates to apply and to bring their unique, authentic and whole selves!

Responsibilities

- Airborne data (Imagery, Lidar and GPS/IMU) initial processing, QA/QC and visual inspection
- Airborne data production and export to meet final deliverable formats and client specifications
- Maintain processing and production tracking sheet(s) to ensure they are updated and accurate
- Administering data backups, exports, uploads and file verification checks
- Communicating and coordinating with field crews to determine required reflights
- Survey flight planning and assisting with responding to RFPs and bids in a timely manner
- Communicating with clients effectively, professionally and with the highest level of customer service
- Basic cartography, map making and spatial analysis
- Various office administrative tasks

Requirements – Must Have

- Degree, Diploma or Certificate from a recognized GIS, Geomatics or Remote Sensing program
- 2+ years of practical work experience in the GIS, Geomatics or Remote Sensing industry
- Familiarity with digital geospatial software: ArcGIS, ESRI, ENVI, QGIS, GoogleEarth, AutoCAD or equivalent
- Experience with automation through scripting (Python, JavaScript or other programming languages)
- Phenomenal attention to detail with an emphasis on quality of work and consistency
- Customer-focused, safety-minded, highly organized and diligent, with excellent communication skills
- Reliable, self-starter, leadership-focused and comfortable working independently in a small office
- Be able to legally work in Canada

Requirements – Asset to Have

- Experience with GPS/IMU software: NovAtel/Applanix + understanding of Coordinate Systems/Datums
- Experience or exposure to LiDAR, UAVs, ground surveying, ground control & base stations
- Project Management experience
- Hands-on experience and passion for technical troubleshooting of both hardware and software
- Knowledge and/or exposure to the aviation industry

Compensation

- Salary Range: \$38,000 – \$44,000 per annum, commensurate with experience and responsibilities
- Health/Medical Benefits package
- Two weeks paid vacation per annum, with additional two weeks paid time-off over winter holidays
- Paid training opportunities for personal & professional development
- A challenging, fun and safety-focused environment, with flexible work schedule
- The love and respect of our Kisik family and community
